Care Instructions

CARE / MAINTENANCE

Our wood-grain finishes are resistant to abrasion, humidity, weather, light, corrosion and most importantly, they are fire-retardant, as opposed to real wood or resin. DuraCare chairs are highly resistant to nicks and scratches. In cases where touchups are needed, we offer special kits made to match any of our 13 wood grain colors, that can be easily applied to the frame. In the event that this application does not prove satisfactory to the customer, the chair will be replaced.

ROUTINE CLEANING

For routine cleaning, dust the wood grain with a microfiber cloth. Microfiber cloth will delicately wipe the wood grain and the knit construction of the cloth is designed to pick up dust and oils without leaving lint behind. For a more intensive cleaning, you can use Pledge, wax, sealant, soap, and water on the wood-grain finish.

SPECS AND ADDED FEATURES

Our entire line of products are manufactured with high pressured die-cast aluminum, without noticeable welding points, due to our cutting edge and innovative welding process. We can guarantee that as there are no screws or hinged brackets used in the construction of our frames, our frames will not wobble or shake after any amount of time, as opposed to wood and resin arm chairs, which can begin to wobble after a short period of time.

WEIGHT CAPACITY

All of our aluminum wood-grain frames, while very strong and using an industry first 14 gauge tubing, are also lighter and easier for residents and staff to move around than other types of seating. All DuraCare Seating wood-grain chairs have been tested to hold a weight capacity of 350 lbs and our bariatric models have been tested up to 500 lbs.
